

HERA GLOBAL TECH

#safetyforeveryone

Background

Software Engineer

Hera Global Tech is seeking a software engineer with an interest in social good who will assist in the creation of products that improve society.

This position requires a person with experience in app development and web app development, preferably using Android and react-redux. Experience with service-oriented architectures (SOA) and cloud databases (eg., Google Firestore) is a plus.

Hera Global Tech's Mission

Provide solutions that promote personal safety.

Job Summary

Position: Part-time Software engineer

Contract: Six-month position – possibility of extension

Schedule: 16 hours/week, flexible schedule

Location: Remote – always

Responsibilities

- Work within the development team to design and develop software that will assist individuals in recovery from addiction, e.g. substance use disorder
- Given partial or complete requirements, write clean and readable Java code within the Android ecosystem
- Given partial or complete requirements, write clean and readable JavaScript code using the React Redux framework
- Assist in cloud database development (e.g., Google Firestore)
- Participate in peer code reviews
- Collaborate with designers and content creators on UI and UX
- Write tests and perform manual testing for code you write
- Write documentation for software you write and others write
- Participate in standups, weekly or biweekly, in an agile fashion
- Adequately use a version control system (e.g., git) to manage software revisions
- Monitor, track, and report tasks using an issue and project tracking system (e.g., Gitlab)

Position Perks

- Work at home with a flexible schedule
- Work with a dynamic and successful distributed team of professionals and entrepreneurs
- Contribute to the development of a product that has a mission to keep people safe
- Know that your work has value and an end purpose
- Complete your required weekly hours on an agreed upon schedule

Qualifications

- Undergraduate degree in Computer Science, Software Engineering, or related field
- Two or more years of relevant demonstrable software engineering experience
